Mechanical
Connection**

**Unique Design
Insures Safety
User Friendly
Simple & Quick Installation
Made in the USA**

**Meets/Exceeds
OSHA 1926.601(b)(10)**

"Trucks with dump bodies shall be equipped with positive means of support, permanently attached, and capable of being locked in position to prevent accidental lowering of the body while maintenance or inspection work is being done."

**Meets/Exceeds
ISO 13333:1994(E)**

"When the device is installed for its safety function, it shall not be possible to dislodge or disengage the safety support device involuntarily."

3 Step Installation

- 1. Set Dump Brace[®] onto truck frame with clamping mechanism beneath the flange.**
- 2. Move down truck frame towards raised bed frame.**
- 3. Using a ratchett, tighten the 2 bolts securely to engage the clamping mechanism.**
